UML : Wireframes and activity diagram :

Wireframes :

Home wireframe (Raphael) :

The wireframe illustrates the layout of a home page for a real estate website. It features a top navigation bar with a logo, menu items, and user action buttons. Below the navigation is a large hero section with a catchphrase and a search filter. The main content area is divided into two sections: 'Recent properties' with a carousel of three property cards, and 'Properties by city' with four city-specific cards. The footer contains a contact form, a list of links, and social media icons.
